Dear Valued Customer,

Re: Inter Medico's Distribution of Davis Diagnostics Products

Inter Medico and **Davis Diagnostics** are pleased to announce an agreement to transfer **Davis Diagnostics** business to Inter Medico in its entirety.

Davis Diagnostics has successfully represented BIOCARE MEDICAL, Anatech Inc. and many other companies for over 15 years in Canada. Davis Diagnostics has provided a level of personalized service and dedication that Inter Medico will endeavour to maintain.

Inter Medico is the largest privately owned Canadian distributor of medical diagnostic and research related products and has been in business for over 30 years. Inter Medico has sales representation in all provinces as well as in-house customer service, technical support and biomedical specialists. **Inter Medico** is committed to bringing you the same high level of technical and operational support for all of the product lines that you have experienced with **Davis Diagnostics Limited** and **we will honour all quotations** that you may have with the company.

To allow for smooth transition all orders for Davis Diagnostic's products should be placed through Inter Medico as of **September 7, 2010**. To place an order or for further technical information please contact Inter Medico toll-free at 1-800-387-9643 or Michele Shackleton at (905) 470-2520.

About the companies...

BIOCARE MEDICAL is a unique manufacturer and supplier of immunohistochemical and histopathology products, monoclonal and polyclonal antibodies, and automated staining equipment. BIOCARE is continually researching the most innovative and cost-effective diagnostic solutions and state-of-the-art equipment. It is their mission to develop and sell products, providing a continuous flow of novel products and relentlessly improving upon what has already been launched.

As many of you already know, BIOCARE MEDICAL is a unique company in the Immunohistochemistry field. Many innovations have been developed and patented by the company. BIOCARE was the first to introduce the Decloaking Chamber for antigen retrieval. This allowed the laboratory to standardize the procedure and also to attain higher temperatures than previously possible. Approximately 4000 units have been placed worldwide with many in use in Canada. BIOCARE also developed the single vial detection system for use with antibody cocktails. It has been a leader in offering new combinations always with patient benefit in mind. Within the last three years, the intelliPATH Immunostainer was launched. Many features have been incorporated into this system to allow for continuous, random access and high throughput. And the Innovations from BIOCARE MEDICAL have not stopped there!!!

Anatech Inc., has been creating innovative products for the histopathology laboratory since 1984. They provide a complete line of fixing, processing and staining fluids intended to produce the highest quality preparations for light microscopy. Most of these are unique to the

marketplace, offering either greater safety, better efficacy, or both. Additionally, **Anatech** carries several OSHA-mandated hazard warning labels for specimen containers and several products to assist in the recycling and disposal of hazardous chemical waste.

Cassette and slide storage boxes, IQ Air filtration units, replacement filters for numerous instrumentation and specimen racks round out the extensive Histology and Immunopathology product offering.

We appreciate your business and look forward to supplying a number of high quality products for your laboratory.

Sincerely,

Michele Shackleton
